

Declaration statement of CO₂ reduction

FCC Construcción S.A. (NL) declares to be committed to pursue a reduction of approximately 3750 tons of CO₂ emission per year. The total expected reduction comprises 30.000 tons of CO₂ over the lifetime of the project (2020 till 2028). The management team will be committed to formulating effective strategies and are devoted to its implementation.

This reduction will be achieved starting 2023 by deploying renewable energy instead of fossil fuels in the office and site locations, by adopting energy efficiency measures and tackling CO₂ emissions related to the four most impactful materials in the design: steel, concrete, ground & asphalt.

Scope 1 emissions (gas consumption): 300 tons of CO₂ reduction

Scope 2 emissions (electricity & business travel): 300 tons of CO₂ reduction

Scope 3 emissions (related to materials): 29.400 tons of CO₂ reduction
